FROM Nov 2013up to October 2014

Job Title: logistic manager

Company: Al Bendery Engineering for TRADING & CONTRACTING CO

Company address: Al thomana , P.O Box 32080 Doha - Qatar.

Project: Project: Al Bustan Complex Location : back side ramada hotel

Logistics manager is responsible for all aspects of the logistics supply chain, stores management, development and optimisation of site logistics solutions to meet the needs of the project. The logistics manager will be required to manage the movement of people, goods and equipment at the construction site and control site facilities management.

Key interfaces that the logistics manager must ensure early engagement with are: the project planner; the commercial managers procuring the works and the senior construction manager on the site. The construction logistics manager should ensure that the construction team is fully aware of logistics activities in support of the build program.

The construction logistic manager's role under the following headings:

Planning/programming

- Plan site set-up to move labour, plant, and materials around site efficiently (eg hoarding, gates, site accommodation, cranes, hoists, security, temporary services, material delivery and waste management strategy, catering).
- Plan internal and external logistics routes through the project phases focusing on separation of vehicles, machinery and people. Lay down areas and offloading points.
- Pre-plan the usage of key assets such as hoists to ensure planned assets meet the needs of the program.

Mobilization

- Create a secure site
- Responsible for all traffic management internally and externally, weighbridges and road network cleanliness.
- Manage installation of site accommodation and manage these facilities
- Create operational procedures and method statements
- Organize site inductions, ensure induction records are securely stored.
- Create a schedule of logistics meetings and ensure logistics is represented at site meetings.

Supply chain management

- Describe the characteristics of the site, including site access /egress, storage capacity and arrangement by programmer, labor, hoists, cranes etc
- Use the description to produce daily, weekly and long term movements plans
- Understand procurement arrangements
- Control materials in and out of site.

- Plan and integrate with key contractors to meet the needs of the planned programmer and de-confliction of onsite space and time where appropriate.
- Assist in the evaluation of potential logistic suppliers and appropriate delivery management booking systems.
- Be capable of managing sub-contractors to deliver their package of goods or services
- Variation control and early communication of foreseeable change
- Commercial/contract basic understanding
- Utilize business management system procedures.
- Record keeping and key performance indicator (KPI) production.

Programme support

- Embrace a delivery-focused culture.
- Organize resources to enable contract deadlines to be achieved.
- Organize resources to work additional hours as required to meet project deadlines (eg extended site hours if required by client).
- Responsible for ensuring logistics activities are not a constraining factor on the program, where deemed unavoidable ensuring the issues are communicated in order that de-confliction can occur.
